

CRITICAL EXPLOSION

FEAT 1

MECHANIC

Prerequisites Mine Exocortex

Your mines use bursts of shrapnel that shred through a creature, causing lasting harm. A creature that fails its saving throw against one of your mines takes an additional 1 persistent damage (or persistent damage equal to your Intelligence modifier on a critical failure). If the mine dealt physical damage, this is persistent bleed damage. Otherwise, the persistent damage is of the same type dealt by the mine.

MODIFY PT. 1

MECHANIC MANIPULATE

Requirements You are holding or wearing your custom rig

Using your trusty custom rig, you quickly customize a piece of gear. Select one item in your possession or in the possession of a willing creature within your unarmed reach. If you select an item in your possession, you can Interact to draw or retrieve this item. Then, apply one of the mods you know to the item. The item remains modded until the end of your next turn. When you Modify an item, you can apply one of the following effects of your choice, called a mod, or any other mod you know. Some mods can only be applied to items of specific types or items with certain traits; these requirements are listed in parentheses.

MODIFY PT. 2

Big Boom (grenade or area weapon): You cram a big payload of explosives into a small package. Increase the item's radius by 5 feet (if it's a burst), its area by 5 feet (if it's a cone), or its area by 10 feet (if it's a line).

Bunker Buster (grenade or weapon): You amplify the destructive capabilities of an item. Whenever the item deals damage to an object, structure, vehicle, or creature with Hardness, the target takes 5 additional damage. If the modded item has the razing trait, apply the additional damage from both this mod and the razing trait.

Incapacitant (grenade or weapon): You swap live ammunition for dummy rounds. The item gains the nonlethal trait.

MODIFY PT. 3

Magnetic Levitators (armor): You activate powerful magnets in your armor that propel the wearer off the ground. The wearer's land Speed gains hover, and the wearer gains a fly speed of 10 feet.

Long-Range Propulsors (grenade or ranged weapon): You increase the distance you can reliably shoot or throw the item. Increase the item's range or range increment by 30 feet.

Troubleshoot (item): You quickly recalibrate a malfunctioning item. Reduce the value of the item's glitching condition by 1.

MINE PT. 1

Your exocortex manages a network of mines. You can deploy these mines with the Deploy Mine action and activate them with the Detonate Mine action or reaction. Your mines are shielded and can't detonate without your activation command. The DC to Disable your mines is equal to your class DC. You can collect all deployed and undetonated mines as a single action, storing them alongside your other prepared mines in your custom rig. During your daily preparations, you can create a number of mines up to 4 + your Intelligence modifier, which is also your maximum number of mines. This number increases by two at 5th level and every 5 levels thereafter. If you're below this limit, you...

MINE PT. 2

...can craft new mines using your custom rig. For every 10 minutes you spend in exploration mode, you create 2 mines; this doesn't prevent you from participating in other exploration activities. You can store all your mines in your custom rig without increasing its Bulk. Though your mines are physical objects, they are destroyed if not used by the next time you make your daily preparations. They can't be duplicated or preserved in any way. You can Modify one of your deployed mines at a range of 60 feet as if it were a grenade.

DEPLOY MINE

MANIPULATE MECHANIC

Cost 1 mine

You deploy a mine that flies to an unoccupied square of your choice within 60 feet and hovers in place.

Smart Mine (mine exocortex): You program your mines with rudimentary virtual intelligence, allowing them to avoid damaging specific targets. Select one target within 60 feet. That target is excluded from the area of all mines you detonate. At 5th level, you can instead select two targets.

Targeting Mine (mine exocortex): Your mines' proximity sensors enable you to pinpoint creatures in range. Increase the mine's damage by an amount equal to your Intelligence modifier.

DETONATE MINE

CONCENTRATE MECHANIC

Requirements A mine you deployed is within 150 feet

With a moment's thought, you trigger the detonation of a mine you deployed within 150 feet, causing it to explode in a 10-foot burst. This mine deals your choice of either 2d6 fire damage or 2d6 piercing damage. Creatures in the area must attempt a basic Reflex save against your class DC.

You can Detonate Mine as a reaction, with the following trigger.

Trigger A creature enters or leaves a square within the 10 feet of a mine you have deployed. If your mine has a larger radius, increase this distance to that amount.

At 3rd level and every 2 levels thereafter, the damage increases by 1d6. At 10th level, the burst radius increases to 15 feet, and at 15th level, the burst radius increases to 20 ft

CUSTOM RIG

You begin with a specialized toolkit called a custom rig. Your custom rig has 1 Bulk and counts as both a commercial toolkit and any one of the following toolkits: a commercial hacking toolkit, a commercial infiltrator's toolkit, or a commercial maker's toolkit. You can use your custom rig with one hand if you're wearing it or two hands if you're holding it. Whenever you purchase one of the listed toolkits, you can spend 10 minutes integrating that toolkit into your custom rig without increasing its Bulk. Your custom rig and any integrated toolkits can't be sold or used by another creature. If your custom rig is lost or destroyed, you can spend 1 hour building a new one. Your previous custom rig stops functioning, and your new custom rig doesn't have the properties of any previously integrated toolkits.

ARREST A FALL

Requirements You have a fly Speed.
Trigger You fall.

You attempt your choice of an Acrobatics check or Reflex save to slow your fall. The DC is typically 15, but it might be higher due to air turbulence or other circumstances.

Success You take no damage from the fall.

OPEN-SOURCE RESEARCH FEAT 1

GENERAL SKILL

Prerequisites Trained in Computers

Frequency Once per hour

Requirements You have a comm unit and infosphere access

Infosphere archivists have lived by the credo that information wants to be free, and you know where to find it. You Access Infosphere. On a critical failure, in addition to the usual effects, your comm unit becomes glitching 5.

PROGRAMMER

FEAT 1

GENERAL SKILL

Prerequisites Trained in Computers

You can write computer programs. You can Earn Income using Computers, spending your time programming apps for clients. You can also Craft items with the virtual trait. You can use Programmer to Craft tech items that don't have the virtual trait, but you can only cover up to a quarter of the item's cost in raw materials; the remaining Crafting has to be completed by someone using the Crafting skill.

STARSHIP COMBAT

Mechanics are at home helming the generator, where they can Reposition Shield using Crafting or benefit from the mechanic generator module upgrade, but they can push practically any battle station they helm past its limit depending on the ship's equipment. The mechanic generator module allows a mechanic to add unique mods to a starship that can turn the tide of battle. The pet drone shell, mine deployment shell, and gunnery turret mount allow mechanics in starship combat to deploy their drones, mines, and turrets, respectively. Mechanics who invest in their mine exocortex might also want to helm a drone console with a pryotechnics drone. Mechanics can Modify any gunnery weapon.

ACCESS INFOSPHERE

EXPLORATION CONCENTRATE SECRET

Requirements You are using a device with Infosphere access.
Skill Computers

You attempt to access a local network, known as an infosphere, to come up with information on a topic. This typically takes 10 minutes of research to find information, with results like Recalling Knowledge on a topic. Larger investigations or topics could require several hours, while single-word answers of information common to that settlement's infosphere may only take a minute, based on the GM's discretion. Significant and longer investigations should use the research subsystem (GM Core). The GM determines the DC based on the topic you're researching. This can be further influenced by the quality of the local infosphere and what information it might possess on the topic, and how well organized it is.

Critical Success You find the information you were searching for. If this was used on a topic you could have used Recall Knowledge on, you instead find this information in 1 minute.

Success You find the information you were looking for.

Critical Failure You find misleading information thanks to incorrect data or online pranks. The GM provides you false information on your topic of investigation (or decides to give you no information, as on a failure).

EARN INCOME

DOWNTIME

You use one of your skills to make money during downtime. The GM assigns a task level representing the most lucrative job available. You can search for lower-level tasks, with the GM determining whether you find any. Sometimes you can attempt to find better work than the initial offerings, though this takes time and requires using the Diplomacy skill to Gather Information, doing some research, or socializing. When you take on a job, the GM secretly sets the DC of your skill check. After your first day of work, you roll to determine your earnings. You gain an amount of income based on your result, the task's level, and your proficiency rank (as listed on the Income Earned table). You can continue working at the task on subsequent days without needing to roll again. For each day you spend after the first, you earn the same amount as the first day, up until the task's completion. The GM determines how long you can work at the task. Most tasks last a week or two, though some can take months or even years.

Critical Success You do outstanding work. Gain the amount of currency listed for the task level + 1 and your proficiency rank.

Success You do competent work. Gain the amount of currency listed for the task level and your proficiency rank.

Failure You do shoddy work and get paid the bare minimum for your time. Gain the amount of currency listed in the failure column for the task level. The GM will likely reduce how long you can continue at the task.

Critical Failure You earn nothing for your work and are fired immediately. You can't continue at the task. Your reputation suffers, potentially making it difficult for you to find rewarding

EARN INCOME TABLE

All amounts in credits

Task Level	Failure	Trained	Expert	Master	Legendary
0	1	1	1	1	1

GALLEY FIRE EXTINGUISHER

ITEM 3

TECH

Base Item Commercial Fire Extinguisher

Source Player Core 239, 241

Price New 40 credits

Bulk L

Hands 1

A dented foam extinguisher recovered from its twisted galley bracket.

DISCHARGE

Spray foam in a **15-foot cone**. Automatically extinguish nonmagical fires; attempt to counteract magical fire effects at **2nd rank** with a **+7 counteract modifier**.

Each use expends **1 chem**. Uses a chem tank of commercial grade or lower.

RECOVERED SUPPLY

☐ ☐ Mark one box per use.

2 chems remain. Refill with compatible chems after these are spent.

COCKPIT HACKING TOOLKIT

ITEM 0

TECH

Base Item Commercial Hacking Toolkit

Source Player Core 239-241

Price New 20 credits

Bulk L

Hands 1 worn; 2 held

Diagnostic leads and interface probes in a pouch bolted beneath the cockpit console.

HACK COMPUTERS

Provides the toolkit required for Computers checks to **Hack**. The commercial model grants no item bonus.

Access a computer without its normal user interface through physical contact or through an infosphere or similar linked network.

HYPOPEN (COMMERCIAL)

ITEM 1

CONSUMABLE NANITE TECH

Source Player Core 242**Price New** 40 credits**Bulk** L**Hands** 1**Activate** 1 action (manipulate)

An intact nanite injector recovered from behind a damaged medical cabinet.

CHOOSE ONE EFFECT

Remove the **fatigued** condition, or decrease the value of **clumsy** or **sickened** by 1.

Inject yourself or a creature within reach that is willing or unable to prevent the injection.

☐ Mark when used; single dose.

CHIEF'S MAINTENANCE CHIP

ITEM 0

TECH

Base Item Data Chip (Player Core 239, 241)**Blank Chip Price** 2 credits**Bulk** negligible

A data chip recovered from a recessed cockpit maintenance socket. Read it using a computer, including the computer in a comm unit.

STORED FILES

Emergency system diagrams, connector specifications, and the cockpit separation checklist.

Chief's annotated ship photographs: model names, replacement parts circled, and short notes about repairs.

CREW INFINITY DECK

ITEM 0

Base Item Infinity Deck (Player Core 240-241)**Price New** 2 credits**Bulk** negligible**Hands** 1

A worn deck of playing cards recovered from a zipped jacket pocket. A handwritten score sheet is folded into the case.

GAMES

An infinity deck can be used to play numerous card games. It grants no listed mechanical bonus.

RECOVERED AIR REGULATOR

SALVAGE

HOMEBREW

Category Campaign salvage**Bulk** L**Price** Negotiated

An intact pressure regulator removed from behind a hab service panel. The inlet and outlet fittings and stamped part number remain legible.

COMPATIBLE EQUIPMENT

A replacement component for compatible air-handling machinery. It needs installation in a functioning system.

Does not generate oxygen or refill suits by itself

INSPECTION & TRADE

A technician can inspect its condition and fittings to determine whether it suits their equipment.

MEDPATCH (COMMERCIAL)

ITEM 1

CONSUMABLE HEALING TECH

Source Player Core 241**Price New** 30 credits**Bulk** L**Hands** 1**Activate** 1 action (manipulate)

A sealed medical patch salvaged from a damaged first-aid cabinet.

APPLY PATCH

The recipient regains **1d6 Hit Points** and gains a **+1 item bonus** to saving throws against diseases and poisons for **10 minutes**.

Apply to yourself or a creature within reach. An unwilling target normally must be paralyzed, petrified, or unconscious.

☐ Mark when used; single patch.

WATCH OUT

FEAT 1

CONCENTRATE ENVOY

Source Player Core 108**Action** Reaction

Trigger A creature targets an ally within 60 feet with an attack, and you can see both the attacker and your ally.

You signal a warning to your ally, granting them a **+2 circumstance bonus to AC** against the **triggering attack**.

EXPERIENCED SMUGGLER

FEAT 1

GENERAL SKILL

Source Player Core 220**Prerequisite** Trained in Stealth

When the GM rolls Stealth to determine whether a **passive observer** notices a **small item you have concealed**, treat the die roll as at least **10**, then add your Stealth modifier.

HIGHER PROFICIENCY

Master: Treat the die roll as at least **15**.

Legendary: Automatically succeed at hiding a small concealed item from passive observers.

ACTIVE SEARCHES

This feat provides no benefit against a creature actively searching you for hidden items with a Perception check.

QUICK REPAIR

FEAT 1

GENERAL SKILL

Source Player Core 226**Prerequisite** Trained in Crafting

Your **Repair** activity loses the exploration trait and takes **1 minute** instead of 10 minutes.

HIGHER PROFICIENCY

Master in Crafting: Repair takes **3 actions**.

Legendary in Crafting: Repair takes **1 action**.

LIE TO ME

FEAT 1

GENERAL SKILL

Source Player Core 224**Prerequisite** Trained in Deception

When you engage in conversation with someone trying to **Lie** to you, use your **Deception DC** in place of your Perception DC if it is higher.

The speaker's Lie check is resolved against that DC.

CONVERSATION REQUIRED

You must have a back-and-forth dialogue. This benefit does not apply when you only listen, such as during a long speech.

ADDITIONAL LORE

FEAT 1

GENERAL SKILL

Source Player Core 215

Chosen Lore Salvage Contracts Lore

Become **trained** in the chosen Lore subcategory.

At **3rd, 7th, and 15th levels**, gain an additional skill increase that can be applied only to this Lore subcategory.

CAMPAIGN SPECIALTY

Salvage ownership claims, recovery agreements, customary fees, and obligations attached to recovered property. The GM determines which checks this specialty covers.

SPECIAL

You can select Additional Lore more than once, choosing a different Lore subcategory each time. Each choice receives its own listed skill increases.

ANALYZE ENVIRONMENT

REFERENCE

CONCENTRATE EXPLORATION

Source Player Core 430

Cost Exploration

Requires Armor environmental protection or a field scientist's kit

Travel at half speed or slower while checking your armor sensors or a held field scientist's kit.

Automatically detect environmental hazards your armor protects against, including their severity: temperature, radiation, presence or absence of air, and similar conditions.

This is not a general scan for hidden traps, creatures, or every danger. Use Search or Seek for those.

SEARCH

REFERENCE

CONCENTRATE EXPLORATION

Source Player Core 432

Cost Exploration

Requires None

Search for concealed hazards, secret doors, and hidden objects while usually traveling at half speed.

To check everything thoroughly, travel no faster than **300 feet/minute**; to check before walking into danger, no faster than **150 feet/minute**. Cluttered locations require stopping for a longer search.

When you encounter a hidden object or hazard, the GM makes a free **secret Seek check** to determine whether you notice it. Detection can require a minimum Perception proficiency.

SEEK

REFERENCE

CONCENTRATE SECRET

Source Player Core 409

Cost 1 action

Requires None

Choose an area to scan, normally no more than **30 feet in any dimension**. The GM can adjust the area, impose distance penalties, or require extra actions for clutter.

The GM rolls secret **Perception** against hidden creatures' Stealth DCs and objects' detection DCs.

Critical success: Detected hidden or undetected creatures become observed; you locate objects.

Success: Undetected creatures become hidden; hidden creatures become observed. You locate an object or gain a clue to its whereabouts.

Limited senses or effects such as invisibility can prevent a creature from becoming observed.

RECALL KNOWLEDGE

REFERENCE

CONCENTRATE SECRET

Source Player Core 190

Cost 1 action

Requires A relevant skill; training not generally required

Suggest a relevant skill and ask the GM **one specific question**. The GM sets the DC and rolls secretly. You can discuss the question and skill before committing the action.

Critical success: A true answer, plus useful context or an answer to a follow-up question.

Success: A true answer. **Failure:** No useful answer. **Critical failure:** A false answer, or no answer at the GM's discretion.

Examples: Piloting for vehicle parts; Crafting for engineering or tech creatures; Nature for beasts; a relevant Lore for its specialty. Ask about a weakness, a defense, or how something works.

AID

REFERENCE

Source Player Core 408

Cost Prepare, then reaction

Requires A willing ally; explain how you help

Prepare to help, usually by spending **1 action** on your turn. The GM decides whether the method works and what check you roll.

Trigger: Your ally is about to make a skill check or attack roll. Use your **reaction** to roll the approved skill or attack, usually against **DC 15**.

Critical success: Ally gains +2 circumstance bonus to that check (+3 if you are master in the check; +4 if legendary).

Success: +1 circumstance bonus. **Failure:** No benefit. **Critical failure:** -1 circumstance penalty.

The GM can change the DC, preparation, traits, or permitted checks to suit the task.

SCOUT

REFERENCE

CONCENTRATE EXPLORATION

Source Player Core 432

Cost Exploration

Requires None

Watch for danger ahead of and behind the group while traveling at **half speed**.

At the next encounter, **everyone in your party gains +1 circumstance bonus to initiative**. Multiple Scouts do not stack this bonus.

AVOID NOTICE

REFERENCE

EXPLORATION

Source Player Core 430

Cost Exploration

Requires None

Attempt **Stealth** to travel unnoticed at **half speed**.

When an encounter starts, you usually roll Stealth for initiative. Compare that same result with enemies' Perception DCs to determine whether they notice you, using the rules for Sneak.

Acting before someone in initiative does not by itself mean you are hidden from them.

SENSE MOTIVE

REFERENCE

CONCENTRATE SECRET

Source Player Core 409

Cost 1 action

Requires None

Assess one creature's behavior. The GM rolls secret **Perception** against its Deception DC or another relevant DC.

Critical success: Learn its true intentions and get a solid idea of mental magic affecting it.

Success: Tell whether it behaves normally, without learning exact intentions or magic.

Failure: Believe the deceptive impression it presents, or think a truthful creature behaves normally. **Critical failure:** Form a false impression of its intentions.

Normally you cannot retry against the same creature until the situation changes significantly. This is not automatic lie detection.

TAKE COVER

REFERENCE

Source Player Core 410

Cost 1 action

Requires Have cover, be near a suitable feature, or be prone

If you have standard cover, improve it to **greater cover**: +4 circumstance bonus to AC, Reflex saves against area effects, and Stealth checks to Hide, Sneak, or avoid detection.

Otherwise gain **standard cover**, giving +2 instead.

Lasts until you move from your space, use an attack action, become unconscious, or end it as a free action. Cover must apply to the direction and situation of the attack.

STEP

REFERENCE

MOVE

Source Player Core 410

Cost 1 action

Requires Land Speed at least 10 feet

Move **5 feet** without triggering reactions caused by movement or leaving or entering a square.

You cannot Step into difficult terrain or use a Speed other than your land Speed.

A useful way to reposition without an attack roll; it does not make you immune to all possible reactions.

HERO POINTS

REFERENCE

Source Player Core 405

Cost No action

Requires At least 1 Hero Point

Start each session with **1 Hero Point**; hold at most 3. Unspent points expire at session end.

Reroll: Spend 1 point to reroll a check. You must use the second result. This is a fortune effect; you cannot spend multiple Hero Points on the same check.

Heroic recovery: When your dying condition would increase, spend **all** your points (minimum 1). Remove dying and stabilize at 0 HP. This does not add or increase wounded, but does not remove existing wounded.

Acting before someone in initiative does not by itself mean you are hidden from them.

SENSE MOTIVE REFERENCE	TAKE COVER REFERENCE	STEP REFERENCE
CONCENTRATE SECRET Source Player Core 409 Cost 1 action Requires None Assess one creature's behavior. The GM rolls secret Perception against its Deception DC or another relevant DC. Critical success: Learn its true intentions and get a solid idea of mental magic affecting it. Success: Tell whether it behaves normally, without learning exact intentions or magic. Failure: Believe the deceptive impression it presents, or think a truthful creature behaves normally. Critical failure: Form a false impression of its intentions. Normally you cannot retry against the same creature until the situation changes significantly. This is not automatic lie detection.	Source Player Core 410 Cost 1 action Requires Have cover, be near a suitable feature, or be prone If you have standard cover, improve it to greater cover: +4 circumstance bonus to AC, Reflex saves against area effects, and Stealth checks to Hide, Sneak, or avoid detection. Otherwise gain standard cover, giving +2 instead. Lasts until you move from your space, use an attack action, become unconscious, or end it as a free action. Cover must apply to the direction and situation of the attack.	MOVE Source Player Core 410 Cost 1 action Requires Land Speed at least 10 feet Move 5 feet without triggering reactions caused by movement or leaving or entering a square. You cannot Step into difficult terrain or use a Speed other than your land Speed. A useful way to reposition without an attack roll; it does not make you immune to all possible reactions.

HERO POINTS REFERENCE	REPAIR REFERENCE	HACK REFERENCE
Source Player Core 405 Cost No action Requires At least 1 Hero Point Start each session with 1 Hero Point; hold at most 3. Unspent points expire at session end. Reroll: Spend 1 point to reroll a check. You must use the second result. This is a fortune effect; you cannot spend multiple Hero Points on the same check. Heroic recovery: When your dying condition would increase, spend all your points (minimum 1). Remove dying and stabilize at 0 HP. This does not add or increase wounded, but does not remove existing wounded.	EXPLORATION MANIPULATE Source Player Core 196 Cost 10 minutes Requires Repair toolkit; stable surface; both hands Attempt Crafting to fix a damaged item. The GM sets the DC, usually its Craft DC. Destroyed items cannot be repaired. Training is not required. Critical success: Restore 10 HP + 10 per Crafting proficiency rank. Success: Restore 5 HP + 5 per rank. Failure: No change. Critical failure: Deal 2d6 damage to the item, reduced by its Hardness. Ranks: untrained 0, trained 1, expert 2, master 3, legendary 4. At trained: 20 HP on critical success; 10 HP on success. Quick Repair changes the time only if you actually have that feat.	EXPLORATION Source Player Core 196 Cost Exploration; time set by GM Requires Trained Computers; hacking toolkit Attempt Computers to access, control, or change an active secured system. The system sets the DC and may require multiple successes. Critical success: Access it, or gain 2 successes; leave no trace. Success: Access it, or gain 1 success. Failure: No progress; some systems activate security measures. Critical failure: Activate special security protocols or become locked out. A lockdown prevents another access attempt for 1 hour. Hack is for security; repairing broken hardware is a different task. Combat Hack is a separate feat.

OPERATE DEVICE

REFERENCE

CONCENTRATE EXPLORATION

Source Player Core 196

Cost Exploration

Requires Use a computer or similar device

Use **Computers** to perform a task with a digital device. Training is not required; the GM sets a DC when a check is needed.

Critical success: Excel, learning secrets or advanced functionality.

Success: Operate it successfully and obtain general information.

Failure: Cannot understand it; -2 circumstance penalty to further attempts to access or play it for the next day.

Critical failure: Make a mistake preventing access to the program for the next day.

An accessible interface does not automatically require Hack.

DISABLE A DEVICE

REFERENCE

MANIPULATE

Source Player Core 196, 209

Cost 2 actions

Requires Trained Thievery; trained Computers for computerized devices

Disarm a trap or complex device. Use **Thievery**, or **Computers** for a computerized device. The GM or device specifies the DC, successes needed, and any higher training requirement.

An infiltrator's toolkit is useful and may be required for a physical device; other access or tools depend on the device.

Critical success: Disable it or gain 2 successes. Leave no trace and can rearm it later if possible.

Success: Disable it or gain 1 success. **Failure:** No progress. **Critical failure:** Trigger it.

Environmental hazards can have their own listed methods instead.

PICK A LOCK

REFERENCE

MANIPULATE

Source Player Core 209

Cost 2 actions per attempt

Requires Trained Thievery; infiltrator's toolkit worn or held

Attempt **Thievery** against the lock's DC. Locks can require several successful attempts.

Critical success: Open it, or gain 2 successes toward opening it. Leave no trace.

Success: Open it, or gain 1 success. Close inspection reveals evidence of picking.

Failure: No progress.

Critical failure: Break your toolkit and leave obvious damage. Repair the toolkit or replace its picks (3 credits; 30 for tactical picks).

This does not itself grant control of a vehicle or defeat every electronic security system.

ADMINISTER FIRST AID

REFERENCE

MANIPULATE

Source Player Core 201

Cost 2 actions

Requires Medkit worn or held; adjacent dying or bleeding creature

Attempt **Medicine**; training is not required. Choose one treatment if the target is both dying and bleeding.

Stabilize: Target must have 0 HP and dying. DC = 5 + recovery DC (usually 15 + dying value). Success removes dying but leaves it unconscious at 0 HP. Critical failure increases dying by 1.

Stop bleeding: Usually check against the DC of the effect causing persistent bleed. Success grants assisted recovery with the lower flat-check DC for particularly appropriate help. Critical failure immediately deals its persistent bleed damage.

Failure has no effect. This action does not restore HP.

TREAT WOUNDS

REFERENCE

EXPLORATION HEALING MANIPULATE

Source Player Core 202

Cost 10 minutes

Requires Trained Medicine; medkit worn or held

Treat one injured living creature, including yourself. Normally attempt **DC 15 Medicine**.

Critical success: Restore 4d8 HP and remove wounded. **Success:** Restore 2d8 HP and remove wounded. **Failure:** No healing. **Critical failure:** Deal 1d8 damage.

Target is immune to Treat Wounds for **1 hour from the start of treatment**. On success, continue to a total of 1 hour to double the HP restored.

Optional higher DCs: expert DC 20 (+10 HP); master DC 30 (+30 HP); legendary DC 40 (+50 HP). These bonuses apply to successful healing, not critical-failure damage.

MAKE AN IMPRESSION

REFERENCE

AUDITORY CONCENTRATE EXPLORATION

LINGUISTIC MENTAL

Source Player Core 199

Cost At least 1 minute

Requires Conversation; no training required

Attempt **Diplomacy vs. Will DC** after friendly conversation. Choose one target, or up to five targets with a -2 penalty. Circumstances can modify the check.

Critical success: Attitude improves 2 steps.

Success: Improves 1 step. **Failure:** No change. **Critical failure:** Worsens 1 step.

The change normally lasts for this social interaction. Attitudes: hostile → unfriendly → indifferent → friendly → helpful.

This improves attitude; use **Request** to ask for a specific favor. Apply Group Impression if you have it.

REQUEST

REFERENCE

AUDITORY CONCENTRATE LINGUISTIC MENTAL

Source Player Core 199-200

Cost 1 action

Requires A friendly or helpful creature

Ask for something the target could accept given its attitude. Attempt **Diplomacy** against a DC set by the GM. Training is not required.

Critical success: Agrees without qualifications.

Success: Agrees, possibly with conditions or changes.

Failure: Refuses, perhaps offering a less extreme alternative.

Critical failure: Refuses and its attitude worsens 1 step.

Even helpful creatures will not accept some requests. Ordinary conversation does not require a check for every question.

GATHER INFORMATION

REFERENCE

EXPLORATION SECRET

Source Player Core 199

Cost Usually 2 hours

Requires Access to people; no training required

Ask around local gathering places about an individual or topic. The GM sets the time and DC for a secret **Diplomacy** check.

Success: Learn information the GM provides.

Failure: No useful information. **Critical failure:** Collect misinformation.

Bribes, drinks, or gifts may help as the GM determines. Apply **Hobnobber** if you have it.

Talking to one known contact can simply be a conversation; this activity is for canvassing an area.

DEMORALIZE

REFERENCE

AUDITORY CONCENTRATE EMOTION FEAR

MENTAL

Source Player Core 200

Cost 1 action

Requires Aware of a creature within 30 feet

Attempt **Intimidation vs. Will DC**. Training is not required.

Take a -4 **circumstance penalty** if the target does not understand your language or you are not speaking a language.

Critical success: Frightened 2. **Success:** Frightened 1. Failure has no effect.

Regardless of outcome, that target is immune to **your** Demoralize for **10 minutes**.

Frightened imposes a status penalty equal to its value on all checks and DCs, including AC. Normally decrease it by 1 at the end of the creature's turn. This does not compel surrender or obedience.

COERCE

REFERENCE

AUDITORY CONCENTRATE EMOTION
EXPLORATION LINGUISTIC MENTAL

Source Player Core 200

Cost At least 1 minute

Requires Conversation; no training required

Threaten a creature, then attempt **Intimidation vs. Will DC**, adjusted for circumstances.

Critical success: Gives information or follows directions unlikely to harm it, for a GM-set duration up to 1 day. Then becomes unfriendly, but is too afraid to retaliate in the short term.

Success: As above, but it may retaliate afterward.

Failure: Refuses and becomes unfriendly unless already worse. **Critical failure:** Refuses, becomes hostile, and is immune to your Coercion for at least 1 week.

Quick Coercion shortens the conversation only if you have that feat. Coerce is not a combat command.

LIE

REFERENCE

AUDITORY CONCENTRATE LINGUISTIC
MENTAL SECRET

Source Player Core 198

Cost At least 1 round

Requires No training required

Tell an untruth. Elaborate lies take longer. The GM resolves a secret **Deception** check against each listener's Perception DC, with circumstance adjustments.

Success: The listener believes you.

Failure: It disbelieves you and gains +4 circumstance bonus against your further lies for the conversation; it is more likely to distrust you later.

Implausible claims are harder or impossible to believe. New contradictory evidence can prompt a later Sense Motive check.

Apply **Charming Liar** only if you have that feat and meet its conditions.

AREA FIRE

REFERENCE

AREA ATTACK

Source Player Core 410

Cost 2 actions

Requires Wielding a weapon with the area trait

Attack the weapon's designated area. A cone or line reaches its range increment. For a burst, place its center anywhere within the first range increment and use its listed radius.

Every creature in the area makes a **basic Reflex save against your class DC + the weapon's tracking value**. You do not roll an attack roll.

Critical success: no damage; success: half damage; failure: full damage; critical failure: double damage. Critical failures also trigger applicable critical-hit effects, including weapon critical specialization.

This is area damage and spends ammunition equal to the weapon's **expend**. Allies in the area are affected too.

BOARD / DISEMBARK

REFERENCE

MOVE

Source GM Core 236

Cost 1 action

Requires Adjacent to a vehicle entry point, or already aboard

Enter through an open top, door, portal, or hatch. If already aboard, disembark into an empty space adjacent to an entry point.

If the vehicle is moving, you need a successful **Acrobatics or Athletics check against its AC**.

Boarding does not give you control. Move to the controls and use **Take Control** to become the pilot.

TAKE CONTROL

REFERENCE

MANIPULATE

Source Player Core 205; GM Core 236

Cost 1 action, usually

Requires Trained Piloting; aboard and adjacent to controls

Attempt a **Piloting check** against the vehicle's piloting DC, adjusted for circumstances.

Success: Become its pilot, or regain control if it was uncontrolled. Failure does not give you control.

Complicated controls can make this a multi-action activity.

You need usable access to the controls. This action does not automatically bypass locks, security, or someone physically preventing access.

DRIVE

REFERENCE

MOVE

Source Player Core 204; GM Core 236

Cost 1–3 actions

Requires Trained Piloting; you are the pilot

Choose the action cost before moving. You cannot Drive through creatures' spaces, including allies.

1 action: Piloting check. Success: move up to Speed and turn normally. Failure: move full Speed straight ahead. Critical failure: as failure, and become uncontrolled.

2 actions — reckless: On a successful control check, move up to twice Speed straight ahead.

3 actions — reckless: Take –5 on the control check. On success, move up to three times Speed straight ahead.

For failed reckless checks, use the Reckless Piloting card. A vehicle gets only **one move action/activity per round**.

STOP

REFERENCE

MANIPULATE

Source Player Core 205; GM Core 236

Cost 1 action

Requires Trained Piloting; piloting a moving vehicle

Bring the vehicle to a stop. This action lists **no check**.

If the vehicle moved last round, you must use a vehicle move action or Stop this turn. Doing neither causes it to become **uncontrolled**.

If already uncontrolled, first regain control with **Take Control**.

RUN OVER

REFERENCE

MOVE RECKLESS

Source Player Core 205; GM Core 236

Cost 3 actions

Requires Trained Piloting; you are the pilot

First make a reckless control check. On success, move up to **twice Speed straight ahead**.

Run over creatures at least **two sizes smaller** than the vehicle. You may ram **one** creature or object one size smaller than the vehicle or larger.

Targets take the vehicle's **collision damage** with a basic Reflex save at its collision DC. A rammed vehicle's pilot can substitute a piloting check.

If a rammed target takes damage, **you and your vehicle each take collision damage with no save**, and movement ends.

For a Huge truck: Medium or smaller creatures can be run over; Large or larger targets can be rammed.

STUNT

REFERENCE

MANIPULATE MOVE RECKLESS

Source Player Core 205

Cost 1 action

Requires Trained Piloting; driving a vehicle

Drive as part of this action and choose a stunt from the Stunt Options card. Apply its penalty to all Piloting checks attempted as part of the Stunt, including reckless checks.

Stunt is reckless: first check to keep control. If the Drive and the Stunt are both reckless, make **two** control checks.

Use the listed movement change or benefit. The GM determines which stunts are physically possible for the vehicle and terrain.

The printed stunt table does not specify a duration for Evade/Barrel Roll's AC bonus. Agree on a duration with the GM before using either; this card does not add a house-rule duration.

STUNT OPTIONS

REFERENCE

Source Player Core 205

Cost Reference for Stunt

Requires Apply the penalty to all Piloting checks during Stunt

Back Off (-1): Move half Speed backward.

Evade (-1): Move half Speed; gain +1 status bonus to AC.

Flip and Burn (-1): Move half Speed, then turn any direction.

Barrel Roll (-2): Move half Speed; gain +2 status bonus to AC.

Flyby (-2): Move half Speed through an enemy square.

Drift (-2): Move half Speed sideways without turning.

Turn in Place (-2): Turn, then move full Speed.

Vehicle capability and terrain determine which stunts make sense. See Stunt for checks and the AC-duration note.

NAVIGATE

REFERENCE

EXPLORATION SECRET

Source Player Core 204

Cost Exploration; usually ~1 minute

Requires Trained Piloting

Plan a short journey, including a route **on foot**, by vehicle, or within a star system. Normally make a secret Piloting check once per day; conditions may require more.

The GM sets DC and time; unfamiliar or unusual environments can require higher training.

Critical success: Excellent orientation; know cardinal directions exactly where they exist.

Success: Enough orientation to avoid becoming hopelessly lost; a general sense of cardinal directions.

This does not automatically locate an unknown settlement or missing person. Express Driver is a separate feat for long-term vehicle travel.

RECKLESS / UNCONTROLLED REFERENCE

Source Player Core 206; GM Core 236–237

Cost Vehicle rules reference

Requires Read alongside Drive, Stunt, and Run Over

Reckless: Before the action, check Piloting to retain control, applying listed penalties. Success resolves the action normally.

Failure: Move the vehicle's Speed straight along its previous heading (GM may drift it up to 45°); it becomes uncontrolled.

Uncontrolled: On the previous pilot's initiative each round, move straight ahead, 10 feet less than the previous round, until stopped or crashed. Terrain can alter this.

Resolve obstacles and creatures using Run Over, with that uncontrolled movement distance. Use **Take Control** to regain control.

VEHICLE BASICS

REFERENCE

Source GM Core 235–237

Cost Vehicle rules reference

Requires Vehicle's statblock

The pilot spends their own actions. A vehicle participates in only **one move action/activity each round**, even if pilots change.

Momentum: If it moved last round, use a vehicle move action or Stop, or it becomes uncontrolled.

Heading: Normally move forward; turn up to 90° for each vehicle length traveled. Use an appropriate Stunt to alter this.

Moving attacks: Attacks from a vehicle that moved in the last round take -2; use -4 if uncontrolled or any action in that round was reckless.

Piloting DCs rise for adverse conditions. Cover depends on the vehicle and angle of attack.

HOBNOBBER

FEAT 1

GENERAL SKILL

Source Player Core 222

Cost Passive feat

Requires Trained Diplomacy; must have this feat

Your **Gather Information** exploration activity takes **half its normal time**, usually 1 hour instead of 2.

If you are a **master in Diplomacy**, a critical failure to Gather Information becomes a failure instead.

This does not guarantee that the rumors you hear are accurate.
