

ENFORCER ROBOT

ENFORCER ROBOT

These sub-sapient robots staff checkpoints and gates and serve as expendable law enforcement throughout the Settled Systems. Cheap to manufacture and deadly in practice, each robot carries a copy of the Settled Systems Code Archive and directives to enforce intersystem law.

ENFORCER-CLASS ROBOT

CREATURE 4

MEDIUM CONSTRUCT ERBIUM ROBOT TECH

Perception +11; darkvision; relay-relay

Skills Acrobatics +10, Athletics +8, Computers +8, Intimidation +14, Society +14, Erbium +16

Str +5, **Dex** +2, **Con** +3, **Int** +1, **Wis** +0, **Cha** +0

Items integrated commercial laser rifle (5 commercial batteries)

AC 20; **Fort** +13, **Ref** +11, **Will** +8

HP 60; **Immunities** bleed, death effects, disease, doomed, drained, fatigued, healing, mental, nonlethal attacks, paralyzed, poison, sickened, spirit, unconscious, vitality, void;

Weaknesses electricity 5

Relay-Relay The enforcer-class robot's optics constantly communicate with Erbium relay infrastructure, allowing it to scan creatures and intercept data transmitted to the nearest relay, including signals from an Astrazoan's identification node.

Code Enforcer Overdrive When a Settled Systems resident is classified as truant by Settled Systems infrastructure, the enforcer-class robot gains a +2 circumstance bonus to nonlethal attack rolls against that creature.

Speed 20 feet

Melee ♦ fist +10, **Damage** 2d6+5 bludgeoning

Ranged ♦ laser rifle +13 (expend 2, mag 10, range increment 80 feet, reload 1, tech), **Damage** 1d8+3 fire

Field Repairs ♦♦ (manipulate) **Frequency** once per 10 minutes; **Effect** The enforcer-class robot salvages an adjacent corpse belonging to a tech creature destroyed no more than 1 month ago and regains 18 Hit Points.

Fire Suppressor ♦♦ The enforcer-class robot sprays a torrent of water that functions as **hydraulic push**. After using this ability, the robot must refill its water tanks before it can use Fire Suppressor again.

TRAIT EXPLANATION

Construct

Source *Alien Core* pg. 212

A construct is an artificial creature empowered by a force other than vitality or void. Constructs are often mindless; they're immune to bleed, death effects, disease, healing, nonlethal attacks, poison, spirit, vitality, void, and the doomed, drained, fatigued, paralyzed, sickened, and unconscious conditions; and they might have Hardness based on the materials used to construct their bodies. Constructs are not living creatures, nor are they undead. When reduced to 0 Hit Points, a construct creature is destroyed.

Tech

Source [Player Core pg. 455](#)

Equipment with the tech trait rely on electricity and may gain the glitching condition. Some creatures and hazards also have the tech trait, such as artificial intelligence, robots, and turrets.

Armor with the tech trait incorporate electronics, computer systems, integrated power sources, and a comm unit.

Shields with the tech trait incorporate electronics, computer systems, and integrated power sources.

Weapons with the tech trait incorporate electronics, computer systems, and power sources. Usually the weapons rely on integrated power sources (such as melee weapons that don't have the powered trait), while others drain batteries with each attack.

Cybernetic augmentations are technological, not magical, though they aren't subject to any effect or attack that targets technology unless it specifies that it affects cybernetics.

Expend

Source [Player Core pg. 255](#)

This indicates how much ammunition is consumed with each ranged [Strike](#) you make with the weapon. Anytime the weapon is fired, the ammunition in its magazine is lowered by the number indicated. Other abilities might cite the use of expend as the amount of ammo required to complete the action.

Magazine

Source [Player Core pg. 254](#)

Many ranged weapons have magazines (or take batteries) to allow for multiple shots in rapid succession without the need to reload. The magazine of a weapon indicates how much ammunition it can hold. Weapons listed with charges represent battery-powered weapons. These weapons hold charges equal to the maximum charges of each battery and can use batteries up to the same grade as a weapon (so a tactical weapon can use a commercial or tactical battery). Some weapons instead utilize chemicals (chems), which are sold in tanks and otherwise function as batteries. Chemicals can't be recharged, and new chems must be purchased after a tank is expended. Most projectile weapons have magazines that hold a maximum number of projectiles, which act as ammunition.

Depending on the specific type of weapon, projectiles could be bolts, darts, flechettes, rounds, or other appropriate ammunition. Most projectile weapons use rounds, while most injection weapons use darts. Ammunition is purchased separately from a weapon, at a cost of 10 projectiles per credit.

Range

Source [Player Core pg. 254](#)

Ranged and thrown weapons have a range increment. Attacks with these weapons work normally up to that distance. Attack rolls beyond a weapon's range increment take a –2 penalty for each additional multiple of that increment between you and the target.

Attacks beyond the sixth range increment are impossible.

For example, a commercial semi-auto pistol takes no penalty against a target up to 60 feet away, a –2 penalty against a target beyond 60 feet but up to 120 feet away, a –4 penalty against a target beyond 120 feet but up to 180 feet away, and so on, up to 360 feet.

Reload

Source [Player Core pg. 254](#)

While all weapons need some amount of time to get into position, many ranged weapons also need to be loaded and reloaded. This entry indicates how many Interact actions it takes to reload a weapon's **magazine**. This can be 0 if drawing specialized ammunition and firing the weapon are part of the same action. If an item takes 2 or more actions to reload, the GM determines whether they must be performed together as an activity, or if you can spend some of those actions during one turn and the rest during your next turn. An item with an entry of “—” must be drawn to be thrown, which usually takes an Interact action just like drawing any other weapon. Reloading a ranged weapon and drawing a thrown weapon both require a free hand. Switching your grip to free a hand and then to place your hands in the grip necessary to wield the weapon are both included in the actions you spend to reload a weapon.

Source Player Core pg. 450

Actions with this trait require you to physically manipulate an item or make gestures to use. Creatures without a suitable appendage can't perform actions with this trait.

Manipulate actions often trigger reactions.
