

BIG WET EYE BLINK

EMOTION MENTAL VISUAL

Frequency once per day

Trigger A creature you're aware of critically succeeds on a Strike against you and would deal damage to you

You blink your big wet eyes at the triggering creature, forcing it to pull back on its attack. The attacking creature takes a circumstance penalty to the damage of the triggering Strike equal to your level + 2. This penalty applies after doubling the damage for a critical hit. The attacker is then immune to Big Wet Eye Blink for 24 hours.

BREATH CONTROL

FEAT 1

GENERAL

You can breathe even in hazardous or sparse air. You can hold your breath for 25 times as long as usual before suffocating (You can hold your breath for a number of rounds equal to 5 + Constitution normally). You gain a +1 circumstance bonus to saving throws against inhaled threats, such as inhaled poisons, and if you roll a success on such a saving throw, you get a critical success instead.

EMPATHETIC WHISKERS

Your whiskers continuously sense the emotions of those around you, which makes you susceptible to mirroring their feelings. You take a -1 circumstance penalty to Will saves against emotion effects. When you end your turn adjacent to an ally with the frightened condition, you must attempt a DC 5 flat check. On a failure, you become frightened 1.

EMPATHETIC TWITCH

FEAT 1

BRENNERI

Your whiskers instinctively twitch and provide you with feedback about a target's current disposition. You gain a +2 circumstance bonus to Perception checks to Sense Motive for targets within 30 feet of you that are not immune to emotion or mental effects.

PERSONAL TRINKET

FEAT 1

BRENNERI

You have an object that comforts you, such as a favorite rock, a childhood stuffed animal, or another trinket. While you hold your personal trinket, you gain a +1 circumstance bonus on saving throws and to Will DCs against fear effects. If your personal trinket is ever lost or destroyed, you can gain another one by spending 1 week of downtime searching for a suitable replacement. Additionally, you gain the Self-Soothe action.

SELF SOOTHE

EMOTION MANIPULATE

Frequency once per round

Requirements You are holding a personal trinket

You grasp your personal trinket tightly and reduce your frightened condition value by 1.

PHREAKER

FEAT 1

GENERAL SKILL

Prerequisites Trained in Computers

You've learned how to hack using alternative methods. You can use Computers to Disable a Device or Hack a system using any computer, comm unit, or terminal instead of a hacking toolkit. If you're an expert in Computers and the equipment you use is at least 3rd level, you gain a +1 item bonus to Disable a Device or Hack.

Special If you have the Combat Hack or Digital Diversion skill feat, you can use this feat to Combat Hack or Create a Diversion without a hacking toolkit.

PHISHING EXPERTISE

FEAT 1

GENERAL SKILL

Prerequisites Trained in Computers

You're skilled at running digital fraud schemes. You can Create a Forgery using Computers instead of Society. Digital forgeries are compared against your Computers DC. Using information gained from a successful forgery usually requires additional checks, including Deception and Society, and casting too wide a net runs the risk of a potential victim figuring out your ruse and turning you in to the authorities.

HOLOGRAM SKEPTIC

FEAT 1

GENERAL SKILL

Prerequisites Trained in Computers

You easily spot the tiny glitches and imperfections in holograms. Even if you aren't Searching, you always attempt a check to disbelieve holograms and effects with the illusion and tech traits that normally require you to Search or Interact with them.

DIGITAL DIVERSION

FEAT 1

GENERAL SKILL

Prerequisites Trained in Computers

Requirements You are holding or wearing a hacking toolkit and have a free hand

Whether it's a sudden comm unit ping or a warning alarm on an equipment display, you can Create a Diversion by using Computers instead of Deception on an adjacent target carrying, wearing, or wielding a tech item.

MANAGEMENT MATERIAL

FEAT 1

GENERAL SKILL

Prerequisites Trained in Society

Anyone who speaks with you about a job, workplace, or office skill set assumes you're a professional in that setting unless you intentionally present yourself differently. You can use Society to Make an Impression on a professional or to Impersonate a type of professional or a specific individual professional. If you use the normally required skills in those situations, you receive a +1 circumstance bonus to the check instead.

CRITICAL EXPLOSION

FEAT 1

MECHANIC

Prerequisites Mine Exocortex

Your mines explode in a cloud of shrapnel that shreds through a creature's weakest points to cause lasting harm. Add your Intelligence modifier to your mines' damage. A creature that critically fails its saving throw against one of your mines is additionally dealt persistent damage equal to your Intelligence modifier. If the mine dealt physical damage, this is persistent bleed damage. Otherwise, the persistent damage is of the same type dealt by the mine.

REPAIR TOOLKIT

ITEM 0

Type Commercial

Price 20 credits

Hands 2

Bulk 1

A repair toolkit contains a variety of delicate tools and supplies that allows you to perform simple repairs while traveling. You can use a repair toolkit to Repair items using the Crafting skill. You can draw and replace a worn repair toolkit as part of the action that uses it.

INFILTRATOR'S TOOLKIT

ITEM 0

Type Commercial

Price 30 credits

Hands 2

Bulk L

You need an infiltrator's toolkit to Pick Locks or Disable Devices (of some types) using the Thievery skill.

MODIFY PT. 1

MECHANIC MANIPULATE

Requirements You are holding or wearing your custom rig

Using your trusty custom rig, you quickly customize a piece of gear. Interact to draw, retrieve, or swap an item, then add one of the mods listed below to the item. The item remains modded until the start of your next turn, but the effect ends early if you use Modify again or if the item is destroyed or a character other than you, your drone, or your turret attempts to use the item. When you Modify an item you can apply one of the following effects of your choice, called a mod, or any other mod you know. Some mods can only be applied to items of specific types or items with certain traits.

MODIFY PT. 2

The selected mod lasts as long as the item is your modded item.

Big Boom (grenade or area weapon): You know how to cram a lot of explosives and accelerant into a small package. Increase the item's radius by 5 feet (if it's a burst), its area by 5 feet (if it's a cone), or its area by 10 feet (if it's a line).

Bunker Buster (grenade or weapon): You amp the destructive capabilities of an item. The item bypasses 5 Hardness, or if it has razing, Hardness equal to 5 + its razing value.

Incapacitant (grenade or weapon): You swap live ammunition for dummy rounds. The item gains the nonlethal trait.

MODIFY PT. 3

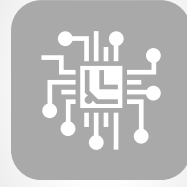

Magnetic Levitators (armor): You activate powerful magnets in your armor that propel you off the ground. Your base land Speed gains hover.

Long-Range Propulsors (grenade or ranged weapon): You increase the distance you can reliably shoot or throw the item. Increase the item's range by 10 feet (if it's a grenade) or its range increment by 30 feet (if it's a ranged weapon).

Troubleshoot (item, drone exocortex, turret exocortex): You quickly recalibrate a malfunctioning item. Reduce the value of the item's glitching condition by 1.

MINE PT. 1

Your exocortex manages a network of mines. You can deploy these mines with the Deploy Mine action and activate them with the Detonate Mine action or reaction. Your mines are shielded and can't detonate from taking damage. The DC to Disable your mines is equal to your class DC. You can collect an adjacent, deployed, and undetonated mine as a single action, storing it alongside your other prepared mines in your custom rig. During your daily preparations, you can create a number of mines up to 2 + your Intelligence modifier, which is also your maximum number of mines. If you're below your maximum number, you can craft new mines using your custom rig. For every 10 minutes you spend in

MINE PT. 2

exploration mode, you regain 2 mines; this doesn't prevent you from participating in other exploration activities. You can store all your mines in your custom rig, with no increase to its Bulk. Though your mines are physical objects, they are destroyed if not used by the next time you make your daily preparations. They can't be duplicated or preserved in any way.

DEPLOY MINE PT. 1 →

MANIPULATE **MECHANIC**

Cost 1 mine

You deploy a mine, planting it in an unoccupied square within 30 feet. You can increase the number of actions you spend Deploying a Mine to two to instead plant the mine in an occupied square within 30 feet. When you Deploy a Mine, you select whether it will deal fire damage or piercing damage when detonated. You can Modify one of your deployed mines at a range of 30 feet, modding the mine as if it were a grenade or with the following new mods.

DEPLOY MINE PT. 2 →

Smart Mine (mine exocortex): You program your mines with rudimentary virtual intelligence, allowing them to avoid damaging specific targets. Select one target within 60 feet. That target is excluded from the area of all mines you detonate. At 5th level, you can instead select two targets.

Targeting Mine (mine exocortex): Your mines' proximity sensors enable you to pinpoint creatures in range. Increase the mine's damage by an amount equal to your Intelligence modifier.

DETONATE MINE OR

CONCENTRATE **MECHANIC**

Requirements A mine you deployed is within 100 feet

With a moment's thought, you trigger the detonation of a mine you deployed within 100 feet, causing it to explode in a 10-foot burst. This mine deals 2d6 fire or piercing damage, based on the damage type you selected when that mine was deployed. Creatures in the area can attempt a basic Reflex save against your class DC.

You can Detonate Mine as a reaction, with the following trigger.

Trigger A creature enters or leaves a square within the burst area of a mine you have deployed.

At 3rd level and every 2 levels thereafter, the damage increases by 1d6.

BATTLE RIBBON

ITEM 0

ANALOG **DISARM** **FINESSE** **NONLETHAL**

REACH **TRIP**

Category Martial

Price 5 credits

Hands 1

Type Melee

Damage 1d4 slashing

Group Flail

Upgrades 1

Bulk L

This sheer nanocarbon ribbon is sharp enough to cut through flesh without interrupting the traditional battle dances that make the weapon famous.

ARC EMITTER

Expend 2

A boom pistol resembles a megaphone with a trigger, emitting sudden bursts of sound capable of shattering bulletproof glass or rupturing organs.

IRISING SHIELD

ITEM 0

RETRACTABLE **TECH**

Price 10 credits

AC Bonus + 1

Speed Penalty --

Bulk L

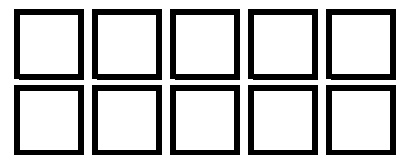

Hardness 3

HP (BT) 6 (3)

An irising shield is made of flexible polycarbon with a retractable design. When retracted, an irising shield looks like a decorative bangle, gauntlet, or glove. When deployed, its panels flare out and form a miniature circular shield.

BATTERIES

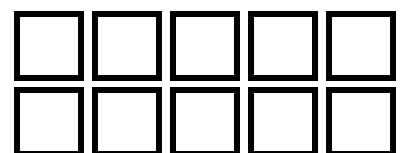

ITEM 0

Arc Emitter

Boom Pistol

LITTLE HELPER

Tuppie positions tools, illuminates Tarn's work area, holds components in place, and feeds her diagnostic information. Tarn gains a +2 circumstance bonus to the next Crafting or Computers check she attempts before the end of her turn. Tuppie must be adjacent to Tarn or the object Tarn is working on.

TUPPIE'S AID

Integrated Medkit Tuppie's internal compartments contain diagnostic sensors, sterile dressings, sealants, injectors, and other medical tools that function as a medkit. Tuppie can use Medicine actions requiring a medkit without carrying a separate one.

Medical Routine Tuppie can perform Treat Wounds using its own Medicine modifier. Tuppie's treatment is technological and non-magical. It otherwise follows all the normal rules for Treat Wounds.

Bedside Protocol When Tuppie succeeds at Treat Wounds, increase the Hit Points restored by 2. On a critical success, increase the Hit Points restored by 4 instead.

TUPPIE'S QUIRKS

Unreliable Tech Once Tuppie is reduced to less than half its Hit Points, or immediately upon being damaged by a critical hit, it becomes permanently glitching 1 until its Hit Points are fully restored, such as by being Repaired

Noncombat Programming Tuppie has no Strikes and can't wield weapons. It won't deliberately harm another creature even if commanded to do so.

Speed 5 feet (hover), fly 25 feet

Perception +7 (darkvision)

Language Talican but can't speak coherently

COMM UNIT

ITEM 1

Price 7 credits

Hands 1

Bulk L

A personal comm unit is a pocket-sized device that combines a minor portable computer and a cellular communications device, allowing instantaneous wireless communication with other comm units in both audio- and text- based formats at planetary range. A personal comm unit also includes a calculator, a flashlight (emits bright light in a 5-foot radius around you and dim light in the next 5 feet), a browser that accesses any local infospheres, and several entertainment options (including games).

GLITCHING

CONDITION

A glitching creature, hazard, or object with the tech trait experiences a combination of debilitating effects and moments of seizing up. The glitching condition always includes a value. If you have glitching equipment and take any action involving that equipment, you must attempt a flat check to see what occurs. If you have the glitching condition, you must attempt this flat check at the beginning of each of your turns. The DC of the flat check equals 5 plus your condition value or the item's condition value.

Critical Success Reduce your glitching value by 1.

Success You act as normal or use your equipment as normal.

Failure You take an item penalty to all your checks and DCs equal to your glitching value or the glitching value of the item you're attempting to use, including saving throws, attack modifiers, and the DCs of abilities, effects, and spells you use.

Critical Failure A glitching object you tried to use doesn't function, and you lose the actions you took to attempt to use it. A glitching creature uses the same effect as a failure and is also stunned 1. A glitching hazard uses the same effect as a failure.

UNTETHERED

CONDITION

You're in a zero gravity (or similar) environment without a means of movement and float without support. You can't take move actions unless they specify they can be used in your current environment. At the end of your turn, you move 5 feet in the last direction you moved. You can take the Push Off action (see below) to change directions and the distance moved. Once you gain a means of moving in your environment, you lose this condition. Typically, a creature with the untethered condition in zero-gravity also gains the clumsy 1 and off-guard conditions while untethered.

PUSH OFF

MOVE

You use as leverage an object or creature of the same size as you or larger to change the direction you're floating in. Float up to half your Speed in your chosen direction. The distance you move at the end of your turn while untethered changes to the amount you moved during this action.

You can Push Off as a free action immediately after you make a successful melee Strike or successfully Shove. You have at least one hand or leg (or suitable appendage) free, and you're untethered.

MINION

TRAIT

Minions are creatures that directly serve another creature. Your minion acts on your turn in combat, once per turn, when you spend an action to issue it commands. For a companion, you Command it; for a minion that's a spell or magic item effect, like a summoned minion, you Sustain the effect; if not otherwise specified, you issue a verbal command as a single action with the auditory and concentrate traits. If given no commands, minions use no actions except to defend themselves or to escape obvious harm. If left unattended for long enough, typically 1 minute, mindless minions usually don't act, animals follow their instincts, and sapient minions act how they please. You can have a maximum of four minions under your control.

A minion has 2 actions and 0 reactions per turn, though certain conditions (such as slowed or quickened) or abilities might give them additional actions or a reaction. Alterations to a minion's actions occur when they gain their actions for the round. A minion can't control other creatures.

TREAT WOUNDS PT. 1

EXPLORATION HEALING MANIPULATE

Requirements You're wearing or holding medkit

You use as leverage an object or creature of the same size as you or larger to change the direction you're floating in. Float up to half your Speed in your chosen direction. The distance you move at the end of your turn while untethered changes to the amount you moved during this action.

You spend 10 minutes treating one injured living creature (targeting yourself, if you so choose). The target is then temporarily immune to Treat Wounds actions for 1 hour, but this interval overlaps with the time you spent treating (so a patient can be treated once per hour, not once per 70 minutes).

The Medicine check DC is usually 15, though the GM might adjust it based on the circumstances, such as treating a patient outside in a storm, or treating magically cursed wounds. If you're an expert in Medicine, you can instead attempt a DC 20 check to increase the Hit Points regained by 10; if you're a master of Medicine, you can instead attempt a DC 30 check to increase the Hit Points regained by 30; and if you're legendary, you can instead attempt a DC 40 check to increase the Hit Points regained by 50. The damage dealt on a critical failure remains the same.

TREAT WOUNDS PT. 2

If you succeed at your check, you can continue treating the target to grant additional healing. If you treat it for a total of 1 hour, double the Hit Points it regains from Treat Wounds.

Critical Success The target regains 4d8 Hit Points and loses the wounded condition.

Success The target regains 2d8 Hit Points, and loses the wounded condition.

Critical Failure The target takes 1d8 damage.

TRAIT EXPLANATION PT. 1

Analog A weapon with the analog trait eschews advanced electronics, computers systems, and electric power sources but was manufactured and calibrated using advanced technology. This weapon is immune to abilities that target technology. Weapon runes don't function on this weapon unless this weapon also has the archaic trait.

Disarm You can use this weapon to Disarm with the Athletics skill even if you don't have a free hand. This uses the weapon's reach (if different from your own) and adds the weapon's item bonus to attack rolls (if any) as an item bonus to the Athletics check. If you critically fail a check to Disarm using the weapon, you can drop the weapon to take the effects of a failure instead of a critical failure. On a critical success, you still need a free hand if you want to take the item.

Reach This weapon can be used to attack enemies up to 10 feet away instead of only adjacent enemies. For creatures with reach, the weapon increases their reach by 5 feet.

Trip You can use this weapon to Trip with the Athletics skill even if you don't have a free hand. This uses the weapon's reach (if different from your own) and adds the weapon's item bonus to attack rolls as an item bonus to the Athletics check. If you critically fail a check to Trip using the weapon, you can drop the weapon to take the effects of a failure instead of a critical failure.

AREA FIRE

AREA ATTACK

Requirements You're wielding a weapon with the area trait.

You attempt to hit each creature in a designated area, which has a range equal to the weapon's range increment (for cone or line) or a designated radius of the explosion (for burst). For burst, you can position the center point anywhere within your first range increment. Any creatures in the area must succeed at a basic Reflex save against your class DC plus the tracking value of the weapon (you don't roll an attack roll). This damage is area damage. Creatures who critically fail this save are subject to effects that occur on a critical hit with this weapon, including the weapon's critical specialization effect. Area Fire has an expend equal to the value listed on the weapon.

TRAIT EXPLANATION PT. 2

Tech Equipment with the tech trait rely on electricity and may gain the glitching condition. Some creatures and hazards also have the tech trait, such as artificial intelligence, robots, and turrets. Weapons with the tech trait incorporate electronics, computer systems, and power sources. Usually the weapons rely on integrated power sources (such as melee weapons that don't have the powered trait), while others drain batteries with each attack.

Unwieldy You can't use an unwieldy weapon more than once per round to Strike and can't use it to Strike as part of a reaction, such as Reactive Strike.

Boost You can boost this weapon with an Interact action to add an additional damage die of the listed size to the next damaging attack you make with the weapon until the end of your next turn. The damage from this trait increases to 2 dice for advanced-grade and superior-grade weapons, 3 dice for elite grade and ultimate-grade weapons, and 4 dice for paragon grade weapons. On a critical hit, roll these after doubling the weapon's damage. Multiple boosts have no effect.

Razing This weapon is particularly good at damaging objects, structures, and vehicles. Whenever you deal damage to an object (including shields and animated objects), structure, or vehicle with a razing weapon, the object takes an amount of additional damage equal to double the number of weapon damage dice.
