

PRINT & ASSEMBLE

Print single-sided on US Letter at Actual size / 100%. Disable Fit or Shrink.
Use automatic page orientation: the intermediate 60 ft line is landscape.
Measure the square below before printing the full set. Each side must be 1 inch.
Solid heavy edges are cut lines; thin gray lines mark the 1-inch grid.
Hatched bridges connect fragile corners. Keep them; they add no effect area.
Four-part templates assemble A1 | B1 across the top, A2 | B2 below.
Two-part lines assemble A then B from left to right, with top edges aligned.
For split shapes, trim the dashed frames and butt matching edges together.
Glue or tape page 28 straps UNDER the seams; their center lines sit on the join.
Then cut the heavy outer boundary, preserving bridges. Trim protruding straps.
A circled cross marks a burst center or the source corner/edge of a cone or line.
Caster footprints can stay attached or be cut out to fit around a miniature.
Cardstock is recommended. The small bridges can tear if cut from thin paper.
The affected squares retain the reference patterns and exact 1-inch scale.

60 ft orthogonal cone / part A1

Frame A1: 8 x 6 inches. Butt edges; glue page 28 straps underneath.

STRUCTURAL EDITION | Keep hatched bridges attached. Assembly straps: page 28.

A 6x8 grid with a thick black stepped border. The border follows the outer edge of the grid cells, creating a staircase effect. The top-left cell contains the label 'B1'.

US Letter | Actual size / 100% | Each grid square = 1 inch = 5 feet

STRUCTURAL EDITION | Keep hatched bridges attached. Assembly straps: page 28.

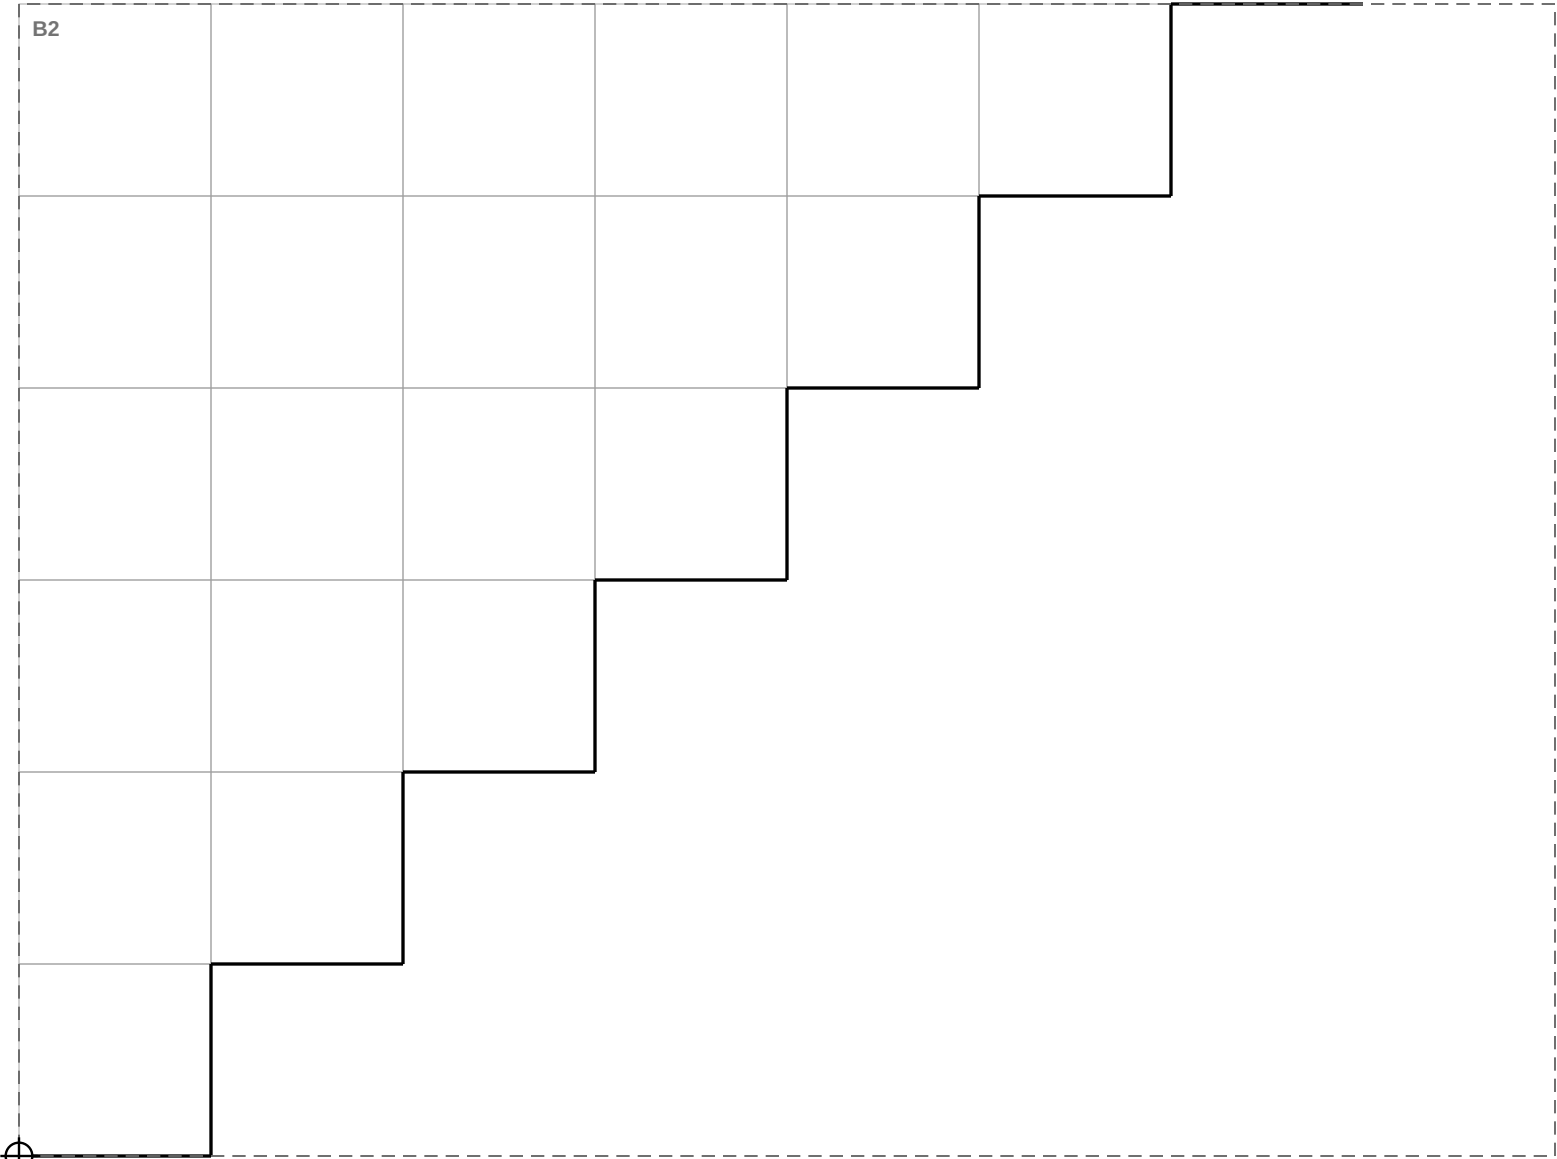

A2

Frame A2: 8 x 6 inches. Butt edges; glue page 28 straps underneath.

30 ft line - diagonal

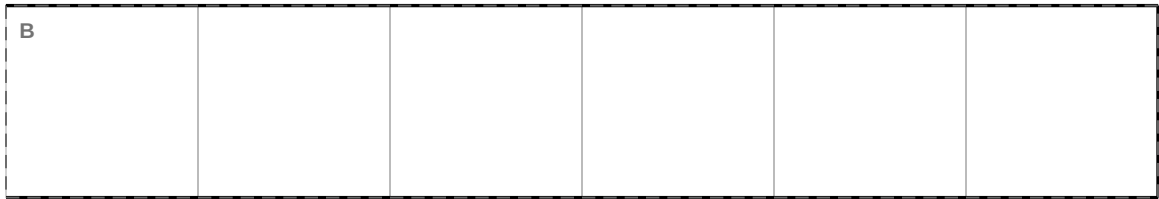

60 ft line - straight / part A

Frame A: 6 x 1 inches. Butt edges; glue page 28 straps underneath.

60 ft line - straight / part B

Frame B: 6 x 1 inches. Butt edges; glue page 28 straps underneath.

STRUCTURAL EDITION | Keep hatched bridges attached. Assembly straps: page 28.

A technical drawing of a stepped profile. The profile is defined by a solid black line. It starts at a point labeled 'A' at the top left. The profile consists of several horizontal segments of varying lengths, connected by vertical steps. The first segment is the longest, followed by a shorter one, then another of similar length, and finally a short segment at the end. The profile is divided into sections by vertical lines. A dashed line extends horizontally from point 'A' across the top of the drawing. A dashed line also extends vertically from point 'A' downwards. The area under the profile is divided into sections by vertical lines, with some sections shaded with diagonal hatching.

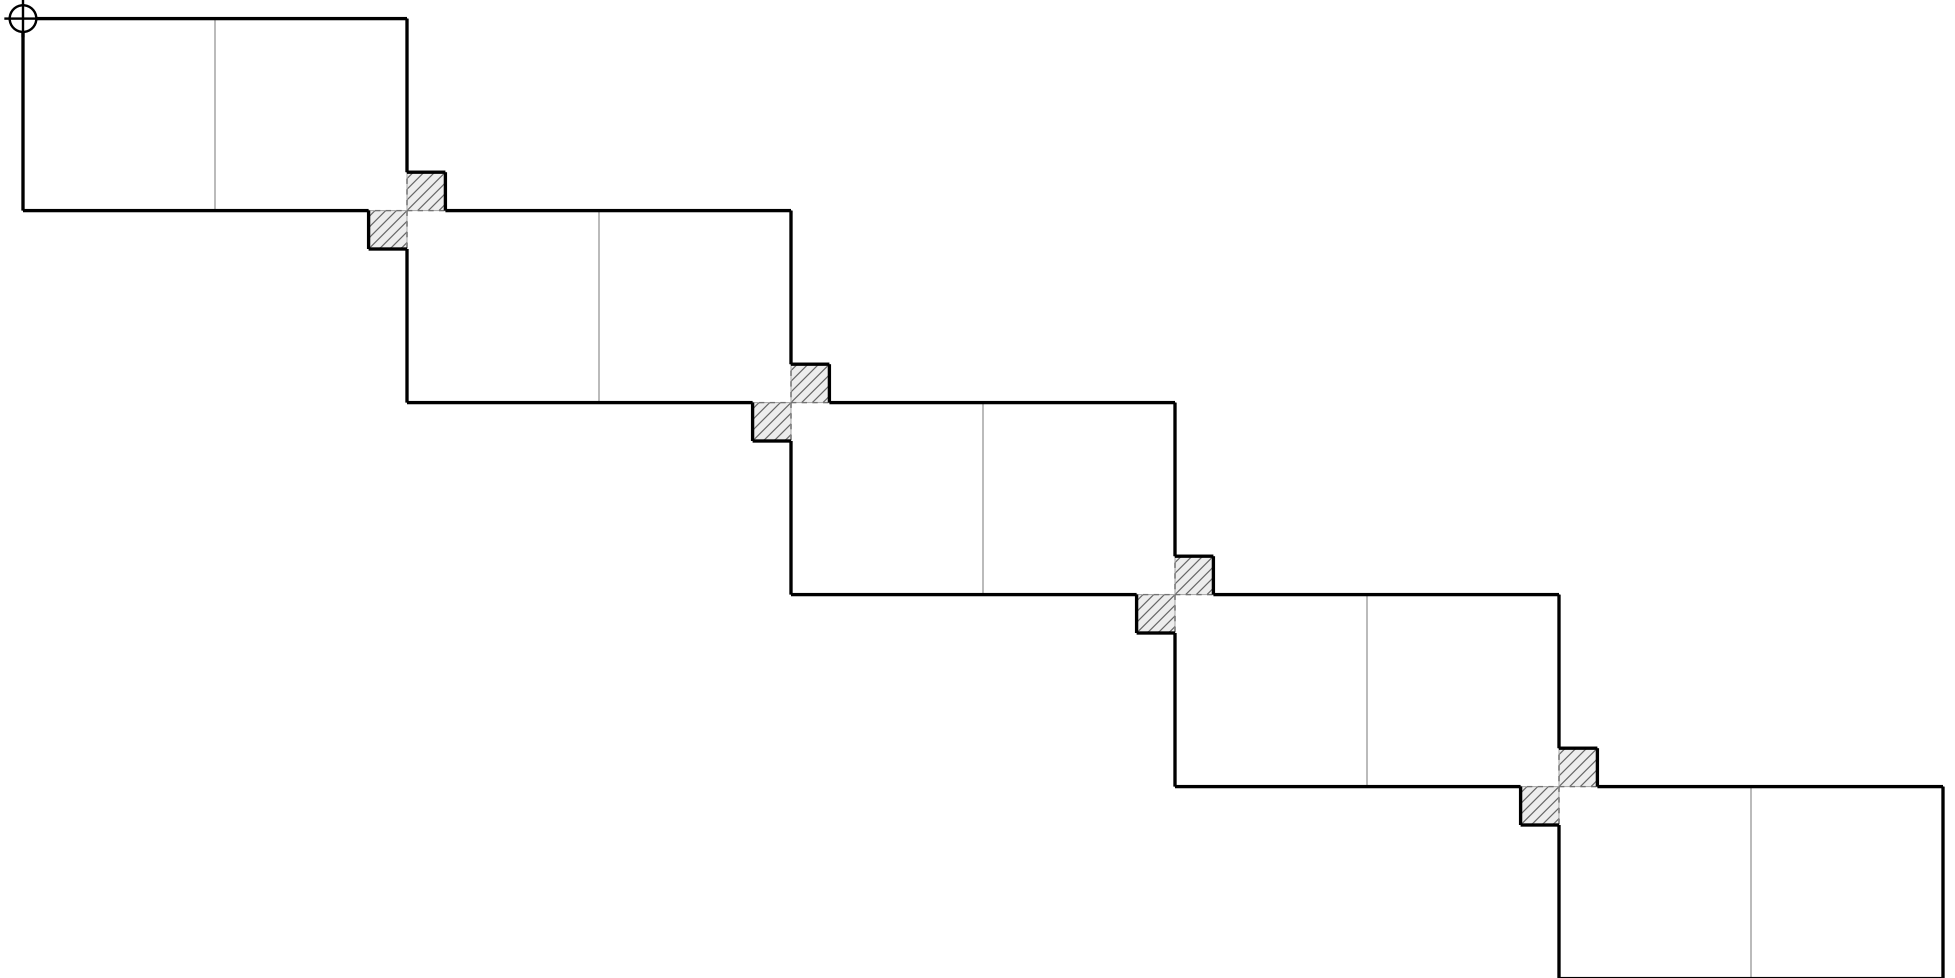

The diagram shows a staircase with 10 steps. The first step is shaded with diagonal lines. The diagram is labeled 'B' in the top left corner.

SEAM SUPPORT STRAPS

Cut out, then glue or tape beneath joins. Align the dashed center with the seam.
Use several along large joins. Trim any portion extending outside the template.
