

THE CREW

Here is a short debrief on the three persons under your care for the expected duration of your time with F.E.D. Please review this document and the other attached information before formally reconciling with your assignees.

8-BALL

8-ball will be your main assignment. His cerebral data banks have been freshly wiped. After being informed of his crimes on REDACTED where he REDACTED, he voluntarily chose to remain wiped. His parts are struggling to re-integrate so they may cause ghosting, and sometimes ghosting can restore parts of a wipe so we need him under Category &4 surveillance. Please perform routine psychological evaluations to ensure his priorities are still aligning with his service (see attached questionnaire). We've already noticed a few quirks developing likely as a side-effect of ghosting. Ensure no contact with anyone that appears to recognize the Android in question. 8-Ball is not to engage with any members of the 'AnChris Militia' under any circumstance.

Skillset: His eye, right arm and other structural parts contain underlying *operative* infrastructure, he has been sanctioned to carry Sven'a--a relic from before his wipe that when removed caused interference with other vital systems. Should you encounter any xenomorphic lifeforms, the side-effects of his ghosting should make him an impressive shot.

Please help 8-Ball repay his debt to society.

PONDERER OF OCEANUS

Ponderer will acquire special attention as well. His closure was overturned internally, and is a special interest of the REDACTED party. Service in F.E.D. has been issued as deferment for closure. His performance will be evaluated to observe how and when his interests re-align with REDACTED interests. He has had difficulty letting go of coverage initiatives at a detriment to himself and his colleagues, we hope his time in F.E.D. service may help relieve this disordered behavior. Closure interests will be re-investigated quarterly.

Skillset: Ponderer is suspected of ambering; this ambering has led him to develop abilities outside the scope of Fonugon genetic-infrastructure. In his time with **REDACTED**, he developed a sense for commanding a group. Commanding a group $\neq$ a tactical mind; watch out for his overthinking should you encounter any xenomorphic lifeforms.

Please help Ponderer repay his debt to society.

MORDRUN STRONGLIMB

Mordrun is a proud volunteer hailing from the clan-holdings on Theosis. A payment has been made out to VSP interests in compliance with Settled Systems Code **A4%9&4-7**, the **Vuddarian Cultural Sanctuary Exemption**. He was several offsets late to intake on the day of the Volunteer Call; ensure his interests remain inline with F.E.D. interests. He has several connections back in Theosis that would be disappointed if he were to not return from his service.

Side Note: Reports were made at 29:08471719 PES about conflicting documents; however, assuming no reports of deviant behavior no investigation has been sanctioned at this time.

Skillset: Mordrun worked on the structural frames of Crown Meridian prior to his volunteering. He is consequently good with his hands and should serve with great technical insight should the need arise on an expedition.

Please help Mordrun be the great volunteer he was meant to be.
