

ERBIUM_CREDIT_TRUST_AND_EQUIPMENT_FINAN

CREDIT TRUST AND EQUIPMENT FINANCING

Erbium-approved financing keeps essential equipment within reach of qualified personnel. All issued property remains subject to the terms of its agreement.

~ Erbium Industries LLC — Personnel Financial Services

QUICK REFERENCE

Rule	How it works
Credit Trust	A rating from 1 to 5 , calculated from your level, liquid credits, and Society proficiency.
Credit limit	Your level's reference reserve × your Credit Trust.
Shared limit	Leased equipment and installment purchases use the same limit.
Lease	Rent reusable equipment for 5% of its listed price per 10,080 offsets , accruing throughout its use.
Installments	Buy an item through payments of 10% of the original amount financed per billing date , until fully paid.
Billing cycle	10,080 offsets , equal to seven standard days. Each account has one scheduled billing date.
Returning leased gear	Stops further rent. Pay any remaining accrued rent; bad condition also incurs the item's full listed price .
Rewards	Contract compensation and bonuses provide credits. Your rating changes through account reviews.

Financing remains subject to item availability and the seller's participation in the program.

I. CALCULATE YOUR CREDIT TRUST

At an account review, find your **reference reserve** by character level. This number is a benchmark for assessment; it is not money added to your account.

Level	Reference reserve	Level	Reference reserve
1	150 credits	11	5,000 credits

Level	Reference reserve	Level	Reference reserve
2	200 credits	12	7,000 credits
3	250 credits	13	10,000 credits
4	300 credits	14	15,000 credits
5	500 credits	15	22,500 credits
6	800 credits	16	32,500 credits
7	1,250 credits	17	50,000 credits
8	1,800 credits	18	75,000 credits
9	2,500 credits	19	120,000 credits
10	3,500 credits	20	200,000 credits

Credit Trust = 1 + reserve bonus + Society bonus. Choose one row from each category below.

Category	Your situation at the review	Bonus
Credits	Less than half your reference reserve	+0
Credits	At least half your reference reserve, but less than the full reserve	+1
Credits	At least your full reference reserve	+2
Society	Untrained	+0
Society	Trained or expert	+1
Society	Master or legendary	+2

Liquid credits are credits you own and can spend. Equipment value, available financing, borrowed money, and someone else's account balance do not count as liquid reserves. Society represents your ability to navigate financial procedures and identify programs for which you qualify; no skill check is required.

Credit Trust	Classification	Credit limit
1	Restricted	Reference reserve × 1
2	Limited	Reference reserve × 2
3	Standard	Reference reserve × 3
4	Preferred	Reference reserve × 4
5	Priority	Reference reserve × 5

ACCOUNT REVIEWS

Review your account when it is opened, at each scheduled billing date, and after a contract payout. You may also request a review after gaining a level. At billing, apply payments first and assess the credits you still have afterward. Record the approved limit until the next review.

Ordinary purchases and payments do not immediately change your rating. A new level changes the reference reserve at review; use the new reserve to calculate both the reserve bonus and the limit. Spending below a threshold can lower your next rating, while receiving a bonus can raise it.

If your commitments exceed a newly reduced limit, existing agreements continue and further financing is unavailable until you have enough room. Account suspension is a separate status: it blocks new financing while preserving the calculated rating.

☰ Level-1 Assessment

Your reference reserve is **150 credits**. You own **100 liquid credits** and are **trained in Society**.

Credit Trust = 1 + 1 for reserves + 1 for Society = **3**.

Credit limit = 150 × 3 = **450 credits**.

2. CHECK AVAILABLE FINANCING

Your approved limit applies to the total value committed across all your agreements. Multiple cards or purchases use the same account.

Commitment	Amount using your limit
Active lease	The item's full listed price, recorded at checkout. Rent payments do not reduce this amount.
Installment purchase	The remaining unpaid purchase balance, including any overdue installments.
Unpaid return-condition charge	The unpaid part of the assessed listed-price charge.

Available financing = credit limit – total committed value, with a minimum of zero.

Before entering a new agreement, its commitment must fit within your available financing, and your account must permit new borrowing. Paying liquid credits toward a purchase upfront reduces the amount financed. The recorded price and rate of an existing agreement remain fixed when your level or rating changes.

Overdue rent is tracked under **Past Due**. Overdue purchase installments are already included in their purchase balances, so do not add them to committed value again.

3. LEASING REUSABLE EQUIPMENT

A lease permits you to use an item while Erbium retains ownership. Reusable tools, weapons, armor, and other approved durable equipment can be leased. Ammunition, consumables, and other expendable goods must be purchased.

Lease term	Rule
Recorded value	The item's full listed price at checkout.
Rental rate	5% of that price per 10,080 offsets.
Accrual	Rent accrues from the checkout stamp until the return stamp.
Collection	Accrued rent is collected at scheduled billing dates; any unbilled remainder is due on return.
Ownership	The item remains Erbium property throughout the lease.
Duration	Payments continue for as long as you keep the item.
Rent already paid	Covers previous use and does not count toward ownership or a damage charge.

Accrued rent = listed price × 0.05 × unbilled offsets used ÷ 10,080.

At each bill or return, charge only the time since checkout or the last billed-through stamp, whichever is later. Once a period has been billed, record its end stamp even if the bill is unpaid; the charge becomes arrears and must not be billed a second time.

Keep fractional rent during the calculation. Add the lease charges being settled together and round the resulting rental subtotal up to the next whole credit once. There is no rounding or separate minimum charge for every offset.

RETURNING LEASED EQUIPMENT

Record the return stamp when the item is accepted back. Rent stops at that stamp, even if inspection or payment happens afterward.

Return condition	Amount due	Credit-limit effect
Acceptable condition	Unpaid rent and any unbilled rent through the return stamp	Release the item's full listed value.
Bad condition	The same rent, plus the full listed price	Release the lease commitment; any unpaid condition charge uses the limit until paid.

Bad condition means broken, missing essential components, or functionally impaired beyond ordinary wear. Cosmetic wear and damage recorded at checkout are acceptable. You may repair an item before returning it, subject to any repair restrictions disclosed in its agreement. The GM resolves uncertain condition assessments.

The condition charge does not transfer ownership to you: the item has been returned to Erbium. Paying that charge does not create further rent. A lost item has not been returned; contact Erbium to arrange recovery or a settlement that formally closes the lease.

Renting Beyond the Item's Value

Lease payments have no cumulative price cap. If you keep an item long enough to pay more than its listed price in rent, the lease continues at the same rate until you return it or agree to a separate settlement.

4. INSTALLMENT PURCHASES

Installments spread a purchase across recurring payments. Reusable items and consumables both qualify when the vendor offers financing.

Purchase term	Rule
Amount financed	Purchase price minus any upfront payment.
Regular installment	10% of the original amount financed , rounded up to a whole credit.
Due date	Each scheduled account billing date, beginning with the first date disclosed at purchase.
Final payment	Only the amount still owed.
Total purchase payments	The agreed purchase price, including any upfront payment.
Interest and financing fees	None under these rules.
Early repayment	You may pay extra or clear the balance at any time without a penalty.

Purchase term	Rule
Ownership	A reusable item becomes yours when its purchase balance reaches zero.
Consumables	Using them does not cancel their remaining purchase balance.

The regular installment is calculated from the **original amount financed**. It does not shrink each time you pay. Any overdue installments are collected in addition to the next newly due installment, without charging more than the remaining purchase balance in total.

Early payments reduce the balance and shorten the repayment period. They do not postpone the next scheduled installment while a balance remains. A fully paid item releases its remaining commitment and generates no further installments.

Leased equipment cannot be sold without authorization. An authorized sale or return of an item still being purchased applies its agreed buyback value to that item's unpaid balance first; any shortfall remains owed. A lease return simply ends the lease under its return terms and produces no sale proceeds.

5. LEASE OR PURCHASE?

For an item listed at **200 credits**, with no upfront purchase payment:

Arrangement	Payment	Result
Lease for 5,040 offsets, then return in acceptable condition	5 credits	Equipment returned; no further rent.
Lease for 10,080 offsets, then return in acceptable condition	10 credits	Equipment returned; no further rent.
Lease for 10 full billing cycles	100 credits total	Still leased; rent continues while retained.
Lease for 25 full billing cycles	250 credits total	Still leased; rent continues while retained.
Purchase through installments	20 credits per billing date, for 10 payments	Paid in full at 200 credits; item owned.
Lease for 5,040 offsets, then return in bad condition	5 rent + 200 condition charge = 205 credits	Equipment returned; no further rent.

6. BILLING AND MISSED PAYMENTS

All agreements on an account share one recurring due stamp. The first account due stamp is set **10,080 offsets after the account opens**; subsequent due stamps are another 10,080 offsets apart. A new agreement joins the next scheduled bill. Its first due stamp must be shown before you accept it.

Lease charges reflect the actual time used, including partial cycles. Installments are whole scheduled payments and are not prorated when purchased shortly before a billing date. Returning a lease between billing dates settles its remaining rent immediately and leaves the account's regular schedule unchanged.

At a billing date	What to do
Calculate the statement	Add newly accrued rent and newly due installments to unpaid previous charges. Newly due installments cannot exceed the purchase balance that has not already fallen due.
Make a payment	Subtract the credits paid from liquid credits. Apply them to the oldest unpaid charges first; for charges due together, choose which to settle.
Update agreements	Purchase payments reduce purchase balances. Rent pays for use. Payments toward condition charges reduce those charges.
Check arrears	Record unpaid amounts as Past Due. Each unpaid charge appears only once.
Assess standing	Apply the escalation below and review the credit rating using the remaining liquid credits.
Advance the deadline	Add 10,080 offsets to the scheduled due stamp.

Past Due is the overdue portion of amounts already owed. It is a tracking total, not another fee added on top of those amounts. Return charges that are unpaid when due enter Past Due immediately; account escalation is assessed on the regular billing dates.

ESCALATION

Consecutive billing dates ending with an overdue balance	Account status	Consequence
0	Current	Normal access, subject to the credit limit.
1	Notice	Notice of arrears. Settle the overdue amount to return to Current.

Consecutive billing dates ending with an overdue balance	Account status	Consequence
2	Suspended	New leases and financing are declined. Existing agreements and payments continue.
3 or more	Collections	Erbium demands settlement, surrender of leased equipment, or an explicitly offered recovery assignment. Enforcement is resolved in play.

Clearing all overdue charges resets the missed-payment count and removes financial suspension. Any collection action already in progress is resolved with the collector. A payment failure does not automatically disable equipment or create a combat penalty. No additional interest or late fees accrue under this version of the rules.

The GM announces billing dates crossed during travel or downtime. Review them in chronological order, with opportunities to account for payments at each date. If several dates pass with no payments, combine the calculation and apply the resulting status once at the table.

Relay Coverage

Due dates follow PES, including while you are off-stamp. Record attempted payments and any outage. Offline-payment acceptance, extensions, or a disputed corporate record are handled by the GM and the agreement's terms; disconnection alone neither pays a bill nor closes a lease.

7. WORKED ACCOUNT EXAMPLE

A level-1 character has **100 liquid credits**, **trained Society**, and an approved **Credit Trust of 3**. Their reference reserve is 150 credits and their limit is **450 credits**.

Agreement	Recorded price	Current commitment	Payment for a full cycle
Leased scanner	150	150	7.5 rent, rounded with the statement's rental subtotal
Medical supplies purchased on installments	90	90	9
Total	—	240	17 credits after rounding rent

Before payment, available financing is **450 – 240 = 210 credits**. The supplies may be used immediately; the purchase balance remains until paid.

After one full cycle, the character pays **17 credits**: 8 rent and 9 toward the supplies. Liquid credits fall to **83**, the supplies' balance falls to **81**, and the scanner still occupies **150** credits. At review, 83 is still at least half the 150-credit reserve, so Trust remains 3. Available financing is now **450 – 231 = 219 credits**.

If the scanner is returned immediately after that bill in acceptable condition, its 150-credit commitment is released and no further rent accrues. The only remaining commitment is the supplies' 81-credit balance.

8. COPYABLE ACCOUNT TRACKER

Record the approved limit at review. Update the agreement rows when you borrow, return, buy, or pay. The account summary is a total of those rows; it does not create additional debts.

Account field	Value
Account holder	
Level / reference reserve	
Liquid credits	
Society proficiency	
Credit Trust / approved limit	
Total committed / available financing	
Next due stamp	
Expected payment at next due stamp	
Past Due / consecutive missed billing dates	
Status	Current

ACTIVE LEASES

Item	Listed price	Checkout stamp	Billed through	Rent already billed but unpaid	Checkout condition
				0	

On return, settle the final unbilled rent, remove the item from active leases, and retain a short return record. Transfer any unpaid rent or condition charge to the table below. Record the return stamp so no further rent is charged.

INSTALLMENT PURCHASES

Item	Original amount financed	Remaining balance	Regular installment	Overdue portion of balance
				0

UNPAID CHARGES FROM CLOSED LEASES

Returned item	Return stamp	Unpaid rent	Unpaid condition charge
		0	0

Past Due is the sum of billed-but-unpaid rent, overdue purchase portions, and unpaid charges from closed leases. A purchase's overdue portion is included in its remaining balance. Only the unpaid condition-charge column from closed leases counts toward committed value; its rent remains tracked as arrears.

Playtest version 0.1. Reference reserves reproduce the Currency column of the Starfinder Second Edition GM Core Character Wealth table, page 61. Credit ratings, financing limits, payment rates, and contract procedures in this document are campaign house rules.
